Product Concept

Product Concept

Various application tend to go toward to IP-based product.

In recent days, IP based product and system are increasing in various market because IP brings a lot of benefit such as easily built an infrastructure.

This tendency is not only consumer market but also professional such as broadcast.

 Audio is especially-important functions in remote shooting camera market.

In lecture capture at the education market case, teacher's voice quality is more important than video for students who takes a lesson in a remote location.

But it has no specialized camera for audio in the existing market so far.

Promote the existing and new market with SRG-300SE.

Sony provide the IP remote shooting camera with enhanced audio functions to existing remote shooting market in advance of competitor such as Panasonic, Vaddio and security camera manufacture. We promote traditional remote shooting camera market and new market who need audio features with IP technology, and try to maintain high market share.

Main Features

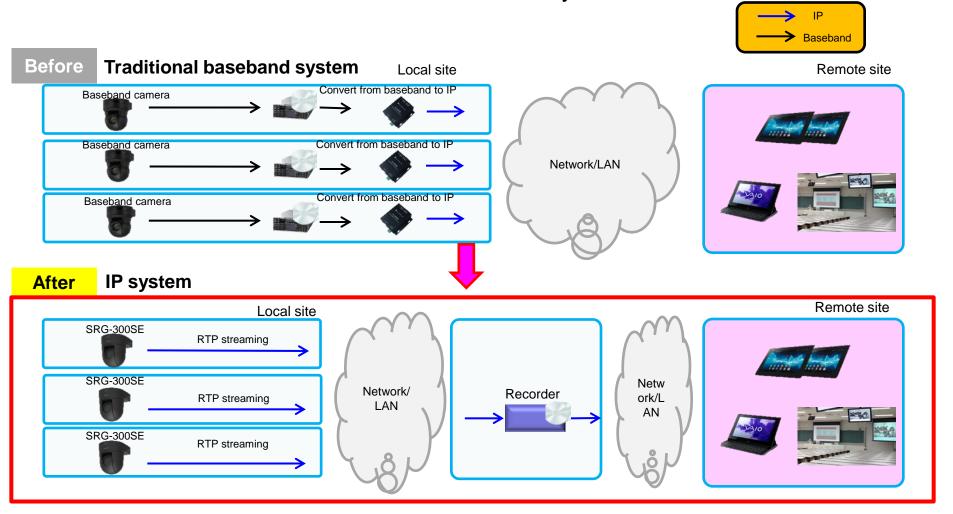

Main Features "Sales points"

- Full-HD IP video and audio streaming
 - -IP H.264 Full-HD video and AAC audio streaming
 - -IP H.264 and baseband video through 3G-SDI simultaneous transmission
- Support an audio
 - -Support an audio input(selectable LINE/MIC-level)
 - -Embedded Auto Gain Control
 - -Easy audio effect equalizer
- Reduce the latency inside camera
- Web viewing and operation
- Up to 256 preset position

H.264 Full-HD video and audio streaming 1

- Simple AV system migration from baseband to IP.
- Create a seamless environment from anywhere.

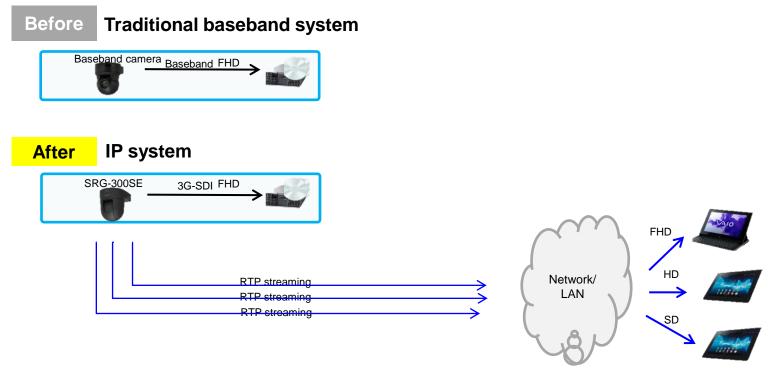

CONFIDENTIAL

H.264 and baseband video simultaneous transmission

- It can simultaneously output 1080/60p baseband video through 3G-SDI and H.264 compressed video/audio via IP.
- Available up to 3 instances but it has limitation according to video format.(Refer to details on next page)

*Audio and video transmission supports only IP video streaming.(Baseband is not possible to transmit audio.)

Up to triple H.264 output

- Available up to 3 instances but it has limitation according to video format.
- In case of 1080/60p transmission, it can transmit just 1 instance due to use large bandwidth. But in case of selects frame-rate to 30fps, it can transmit combinational 3 type of video (FHD, HD and SD).

Full-HD

SDI Video format

- You can select the SDI output video format.
- The default setting of 3G-SDI video resolution is 1080/59.94p(A).
- Larger video resolution than from selected SDI can not be streamed on IP.
- If camera connects to the HD-SDI recording device, select resolutions such as 1080/59.94i, 720/59.94p..

	Video format
	1920 × 1080p/59.94 (Level A)
	1920 × 1080p/59.94 (Level B)
59.94Hz	1920 × 1080i/59.94
	1920 × 1080p/29.97
	1280 × 720p/59.94
	1280 × 720p/29.97
	1920 × 1080p/50 (Level A)
	1920 × 1080p/50 (Level B)
	1920 × 1080i/50
50Hz	1920 × 1080p/25
	1280 × 720p/50
	1280 × 720p/25

Support an external audio input

 Selectable an external audio input RCA for LINE-level or a 3.5φ for MIC.(Both supports Monaural)

*Both can not use simultaneous.

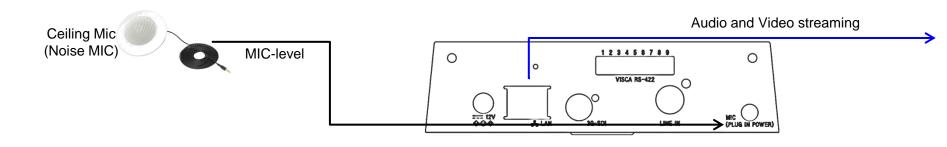

Support an external audio input

- Supports 3.5φ mini plug-in-power input for MIC-level.
- If connects with ceiling microphone, it can be used for noise MIC of lecture capturing at small classroom(10~20people).

*Audio and video transmission supports only IP video streaming.(Baseband is not possible to transmit audio.)

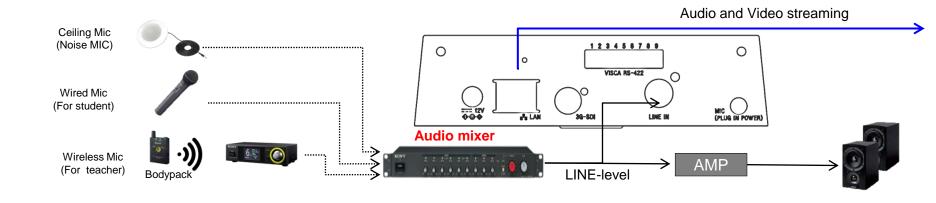

Recommended Microphone					
Manufa cture	Model name	Description	Photo		
Sony	PCS-A1	Video conference system ceiling microphone	0		
Sony	SCA-M30	Video security system ceiling microphone	0		

Support an external audio input

- Supports RCA audio input for LINE-level.
- If connects with audio mixer, it can be used on environment with PA system of lecture capturing at large classroom. (More than 50 people)

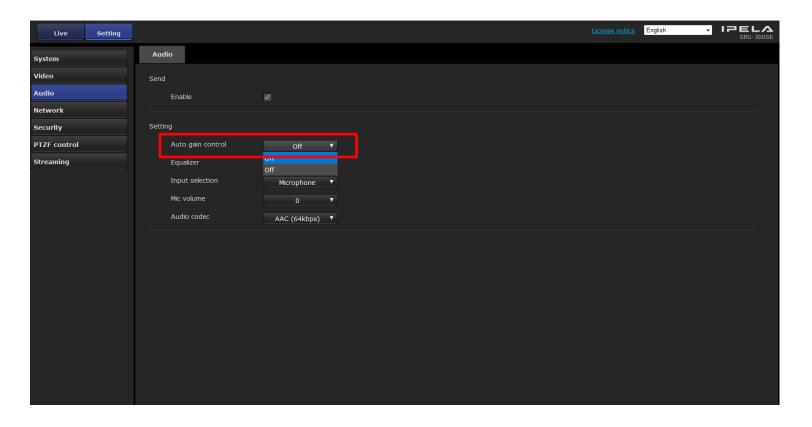

*Audio and video transmission supports only IP video streaming.(Baseband is not possible to transmit audio.)

Embedded Auto Gain Control

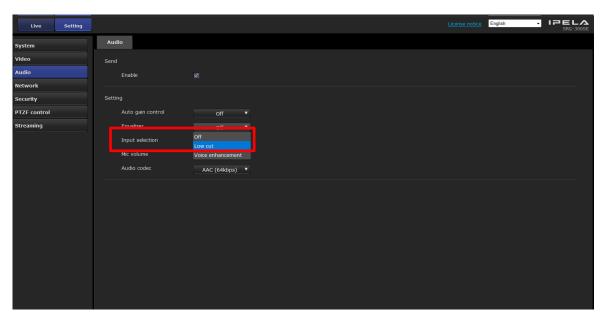

- AGC(Auto Gain Control) ON/OFF function is embedded.
- It can adjust speaker's voice to an adequate sound level.

Easy audio effect equalizer

- Select the 2 type of sound equalizers to adjust the sound frequency response based on usage environment.
 - 1, Low cut: Cutting low frequency response to reduce unwanted background operation noise and wind noise from the projector.
 - 2, Voice enhancement: Cutting low and high frequency responses effects that are outside the area of wanted frequencies makes the speaker's voice more clear.

Reduce the latency inside camera

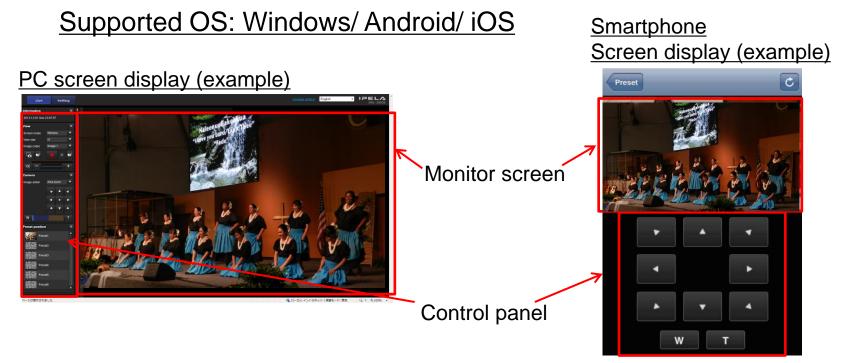

- Sony newly developed the mechanism to reduce the latency effectively between audio and video inside the camera. This feature achieved lower latency comparing to conventional network camera.
- Actual measurement value of gap between Video and Audio at the camera output with IP streaming will be released later.
- This feature in camera realized transmission to recording media with no discomfort for the delay of video and audio. And, accurate audio/video synchronization is achieved using the camera's time stamp in the network-attached recorder.

We will inform you details later.

Web browser control and viewing

- Using ActiveX viewer and plug-in free viewer is able to display an image and PTZ control of the camera, on PC and mobile devises.
- Up to 20 clients can view streaming.(*Up to 10 clients can receive video and audio)
- in case of Android/iOS might not do according to the OS version. *The resolution ,framerate and bitrate setting is limited.

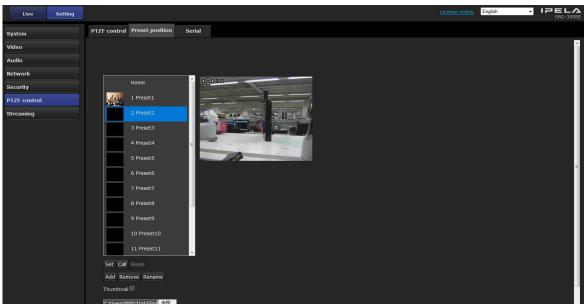

256 preset positions

- camera preset is able to set to up to 256 positions using a plug-in free viewer and ActiveX viewer.
- Position number of from 17th to 256th are stored PTZF only.

RM-IP10 : Up to 16

ActiveX Viewer, Plug in free viewer : Up to 256

ActiveX Viewer (example)

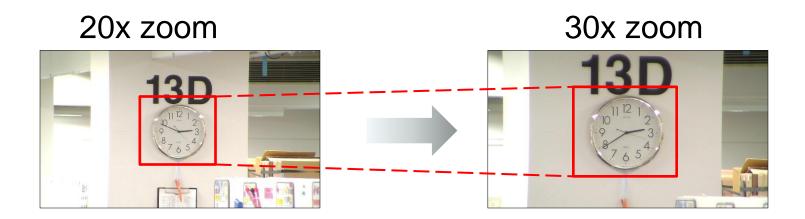

Other Features

30x higher optical zoom

Enhanced image quality with View-DR function

- View-DR is a combination of :
 - Full-capture Wide-D technology,
 - High-speed Exmor™ CMOS sensor, and
 - Visibility Enhancer (VE) technology

View-DR provides benefits:

- In case of video conference, the camera distinguishes light and dark areas in the same scene, adjusts the brightness for dark areas, and also controls the bright areas.
- In case of lecture capturing, teacher's face can not be too dark due to appropriate bright control in the camera.

OFF

ON

NOTE: (performance limitation) When the Wide-D mode sets High,

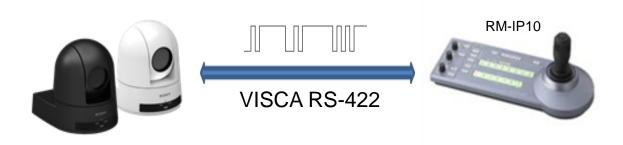

1) When Zoom and Pan/Tilt control under the light-dark change is big gap, the output video can pause in three frames.

2)When Pan and Tilt moves, the color reproduction of high-contrast objet can be incorrect.

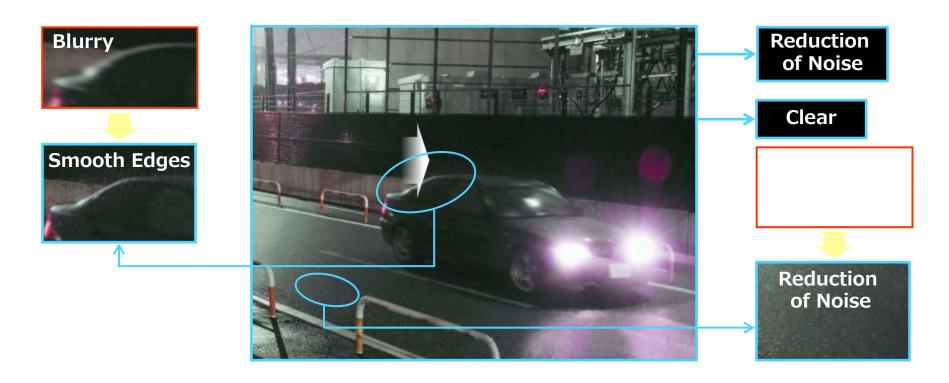

VISCA control

- RM-IP10 can control to camera by serial VISCA through RS-422.
- VISCA over IP function is not implemented on initial version.

eXellent Dynamic Noise Reduction

- Technology from Sony in Cameras and Encoders
- Designed to maximise noise reduction
- Designed to minimize motion blur under low illumination

CONFIDENTIAL

eXellent Dynamic Noise Reduction

- Applies 3D noise reduction to static object dynamically
- Applies 2D noise reduction to moving object
- Combination of 2D and 3D noise reduction algorithm

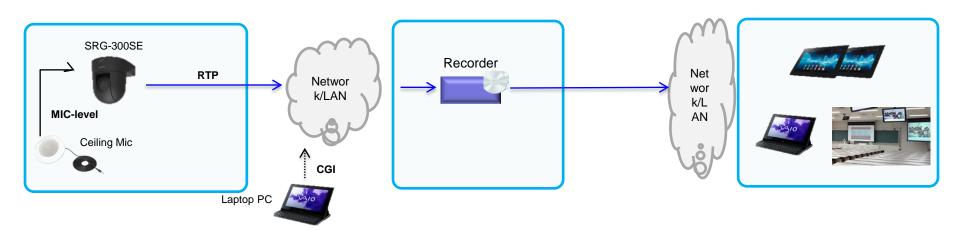

System Configuration & Connection

IP only system

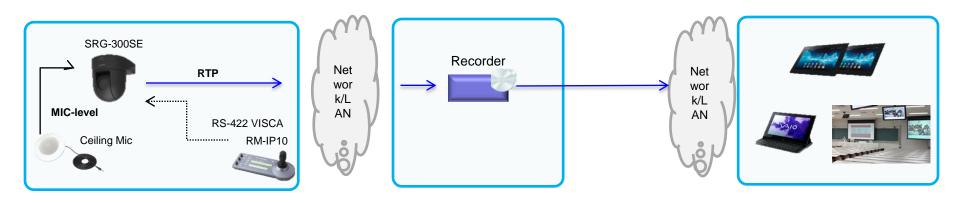

IP video streaming and camera control by CGI command.

IP streaming and VISCA control system

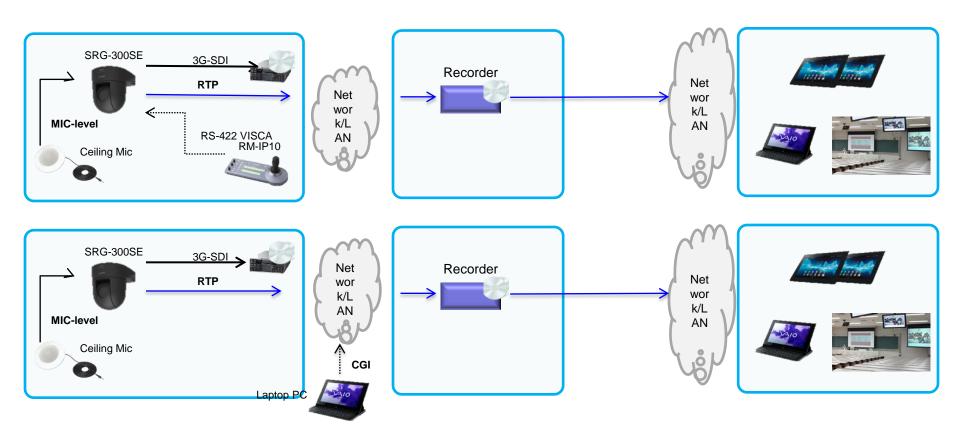

• IP video streaming and camera control by VISCA.

IP and baseband video system

• IP video streaming and baseband video through 3G-SDI outputs.
